

## Job Description

<b>Job Title:</b>	Front-end Developer
<b>Job Reference No:</b>	AD1101
<b>Programme:</b>	Informatics
<b>Grade:</b>	D/D+
<b>Line Manager:</b>	Senior Web Developer

### Main Purpose of the Job

Working within our existing Informatics team, you will be responsible for implementing the front-end components of our web applications with a focus on the mapping and data visualisations elements of these projects. You will work closely with the designer, product manager and other developers to implement modern, cross browser and responsive interfaces.

### Key Areas of Responsibility

Liaise with developers, scientists and geospatial experts to deliver high quality biodiversity informatics products.  
Work closely with the designer and product manager to develop engaging and interactive interfaces.  
Develop processes and methods to ensure consistency and quality across our applications including front end testing.  
Continue to expand your skills and knowledge and stay up to date with the latest developments in front end technologies.  
Ensure all our applications are cross browser compatible and responsive

### Other Duties

Maintain and update existing applications and websites  
Represent the Informatics team around the organisation and at relevant external meetings  
Motivate and inspire other team members to develop their own skill sets  
Manage the delivery of smaller projects
