Thank you for your interest in the role of Senior Modelling Scientist within the Science team at UNEP-WCMC

We are seeking a modelling scientist with expertise in analysis and modelling of biodiversity and ecosystem futures, project and proposal development, networking and collaboration, and team support.

The scientist will work within UNEP-WCMC’s Science Programme which aims to enhance the scientific quality of the Centre’s work through research, training, and partnership development. The main purpose of the job is to contribute to a programme of work focussed on the analysis and modelling of biodiversity and drivers of change. The post holder will provide cutting-edge and novel technical expertise in delivering and expanding the Centre’s work on futures modelling and supporting a range of projects and project development opportunities. The postholder will be expected to try to integrate this work across the Centre, contributing to the Centre’s modelling portfolio. S/he will support relevant staff and projects focussing on marine, freshwater and/or terrestrial ecosystems.

The modelling scientist will be engaged in opportunity development, network building and team mentoring. S/he will focus on futures modelling for the assessment of biodiversity, human pressures, and ecosystem services, interacting externally with initiatives in the biodiversity, modelling and scenarios world.

As well as the skills outlined above, the scientist should have some experience in developing, applying, and understanding broad modelling approaches, and experience with any of the following: ecological/ecosystem models, model-data integration, climate or hydrological models and land-/sea-use or other biodiversity pressures models.

We will provide you with the challenge of working on and developing high profile conservation projects, where your work really makes a difference to the field of conservation in an area aligned to our strategic aims and broader global initiatives. In addition to training and development opportunities, we offer a competitive salary and benefits package, including generous pension contributions.
ABOUT THE TEAM

The Science Innovation area drives the research focus of UNEP-WCMC, using primarily quantitative techniques to produce novel information on biodiversity and ecosystem services. We sit at the cutting edge of conservation science, and our work feeds into all areas of the Centre and its impact.

Our team works with academics, other researchers, and practitioners across the world to design new ways of assessing interactions and relationships between biodiversity and pressures, biodiversity and ecosystem services, climate, health and other aspects of human wellbeing. We strive to understand current relationships, and use this knowledge to drive robust scenarios of future changes. We develop and utilise models such as PREDICTS, Madingley and WaterWorld. We produce novel indices such as the Biodiversity Intactness Index, the Ecosystem Integrity Index, and the Multi-dimensional Biodiversity Index. We find integrated solutions to complex goals such as restoring biodiversity, reducing pressures, and feeding the world, for instance, our work on Bending the Curve, RESTORE+, the China Biodiversity Outlook, Trade Hub and Global Infrastructure Modelling & Mapping. We have projects within Science but also work collaboratively with all the other Centre teams.
ABOUT THE ROLE

Job Description

This post is intended to contribute to broad modelling efforts within the Science Team, also linking with key focal initiatives at UNEP-WCMC. The main purpose of the job is to contribute to a programme of work focussed on the analysis and modelling of biodiversity and ecosystem futures. This is likely to include analyses of the drivers of change and how society might achieve more sustainable futures for biodiversity and society. The role will provide cutting-edge and novel technical expertise in delivering and expanding the Centre’s work on analysis and modelling.

The post will require development and delivery of projects that may focus on marine, freshwater and/or terrestrial ecosystems and include a range of modelling and analysis approaches. The post is envisaged to play a role in the development of the Centre’s modelling capabilities and offering. The post holder will be part of a modelling group and will be expected to develop new projects to continue to grow our analytical and modelling skillset and establish the Centre at the forefront of these scientific contributions globally. The post holder will collaborate across the Centre to develop integrated approaches and outputs. S/he will also be expected to interact externally with initiatives in the biodiversity, modelling and scenarios world, including technologists and policy platforms.

Key Areas of Responsibility

The post holder will contribute to the Science Innovation area’s technical and strategic work on nature trends and futures modelling, with responsibilities including:

- Providing expertise to the Centre’s work in modelling and other quantitative analyses, including working with technical experts within and outside the Science Innovation Area, as well as with non-technical staff, to ensure that we provide impactful, novel, and robust outputs.
- Increasing the modelling capabilities within the Centre and the potential for modelling to support the Centre’s core areas of work.
- Contributing in particular to the strategy for futures modelling and analysis at the Centre.
- Advancing WCMC’s reputation as a leading organisation in modelling and analysis for biodiversity and ecosystems by representing the Centre at external events and initiatives and through networking, collaborations, and outputs.
- Contribute to the development and implementation of selected, high-profile modelling and analysis projects central to the strategic vision for modelling in the Science Innovation area and at the Centre.

Other Duties

- Supporting management of the Science Innovation Area more broadly, such as providing strategic scientific input.
- Line management and associated staff management duties.
- Providing technical support to some of the Centre’s key work including other modelling, remote sensing, restoration projects, private sector and business risk analyses, Protected Area data and analyses, etc.
• Assist in the development and implementation of other global biodiversity and conservation projects, for example, analyses of the impacts of current and future global change on land, freshwaters, and oceans, and how these will affect biodiversity and ecosystem service delivery.
• Work with project teams to write up results of analyses as technical reports and scientific papers as required.
• Attend (in person and/or virtually) relevant conferences, workshops, and other specialist meetings both in the UK and internationally, on behalf of UNEP-WCMC.
• Undertake any other duties as required, commensurate with the level of the post.

Person Specification

Qualifications/Education

Essential:
• Post-doctoral/work experience in land use modelling or ecological modelling or analyses of the effects of global change on biodiversity/ecosystems.
• PhD in modelling/related scientific field.

Desirable:
• Expertise in models of the drivers of environmental change.
• Expertise in scenario production or assessment.
• Experience of policy analysis.
• Experience working in the intersection of biodiversity science, ecology, and Earth system science.

Experience

Essential:
Expertise in two or more of the following is essential:
1. Process based ecological models in marine or terrestrial environments, OR; statistical biodiversity models
2. Modelling and analysing drivers of biodiversity change.
3. Development and quantification of pathways of actions towards sustainability, stakeholder management, and policy decisions.

Combined with:
• Demonstrated engagement across a range of biodiversity and ecosystem fields with outputs/publications in relevant areas.
• Experience mentoring colleagues and a willingness to train the next generation of biodiversity scientists.

Desirable:
• Knowledge of marine, terrestrial and/or freshwater ecology.
• Knowledge and experience in the development or use of biodiversity indicators.
• Experience with remote sensing or other big data analyses.
• Network of national and international contacts and experience developing partnerships with key external scientific partners and funders.
• Experience managing budgets and/or project management.
• Fundraising experience.
• Experience providing technical guidance.
Skills

- Proven ability to collaborate with colleagues from a range of disciplinary backgrounds.
- Proven analytical skills applied to ecological modelling, including the ability to produce novel analyses using appropriate programming languages/code such as Python, R, C++, MATLAB, etc.
- Team player with proven ability to work collaboratively and internationally.
- Experience and/or willingness to develop and support project-based analysis efforts.
- Ability to write clearly and succinctly, for example, in publishing, reporting and proposals.
- Excellent interpersonal communication skills.
- Demonstrated ability to synthesize and clearly communicate complex scientific concepts to a range of audiences (including non-specialists).
- Fluency in written and spoken English is essential.
- Fluency in further languages is highly desirable, including core UN languages.

Type of Person Required

- Adaptable, able to work collaboratively with others, inside and outside the organisation.
- Able to prioritise and balance multiple projects and competing demands on time.
- Innovative, keen to develop ideas.
- Team player happy to work with colleagues from many disciplines.

Other Relevant Information

The post holder will be expected to interact in a professional manner with clients and partners.
OUR OFFER

Job Title: Modelling Scientist
Team: Science
Reporting to: Senior Programme Officer
Job Reference: AD1308
Start date: TBC
Salary: £27,000 - £36,000
Contract: Permanent, full-time
Location: The post holder will be expected to locate within commuting distance of our main offices in Cambridge, UK. We are usually able to offer sponsorship to the preferred applicant.

This is not a United Nations Post

As a minimum we aim to match market rates for the conservation charity sector in Cambridge and invest a lot of effort to benchmark our salaries, ensuring that people are rewarded fairly for their role. To add to this, we offer some great benefits - here are the highlights:

- 12% non-contributory pension after 1-year service
- Flexible and family friendly working
- Life assurance against death in service (4X annual salary)
- Extended pay protection for serious illness that exceeds 6 months
- Excellent training and development opportunities, tailored to individual needs
- Scheme to buy (or sell) additional annual leave
- Cycle to work Scheme
- Fantastic shared social space and kitchen facilities
- Employee assistance programme and bereavement line to offer help and advice to staff and their families
- Brilliant Social committee that help to keep things fun!
- Caring Staff Liaison Committee
- Focus on environmental sustainability kept in check by our Environment Committee
- Free (proper) tea and coffee!

Training

Our aim is to do our best for every person who works for us, so that they build their skills and knowledge over their career with us, and when they leave (some never do!) they are better placed to move onto the next stage of their career.

We have a comprehensive induction programme that spans the first 6 months including what’s critical in the first week, first month, and then monthly afterwards.

- We encourage everyone to use 5 days for their own personal development each year
- Standard training course which include: Management Development; Coaching culture; Resilience; Negotiation; Pitching and closing a deal.
- We also design our training annual personal development reviews and organise bespoke training courses that meet the skill gaps in the organisation and fulfil the training needs of the people within it.
- Peer-to-Peer learning from our community of experts, taking advantage of the breadth and depth of knowledge and experience across the organisation.
- Internal and external invited speakers, workshops and talks that anyone can join or initiate.
ABOUT UNEP-WCMC

The UN Environment Programme World Conservation Monitoring Centre (UNEP-WCMC) is a global Centre of expertise in biodiversity. We work at the interface of science, policy and practice to tackle the global crisis facing nature.

The Centre operates as a collaboration between UN Environment Programme and the UK registered charity WCMC. Our cutting-edge science, data and insights inform policy and business decisions worldwide. This position is with the charity WCMC, working in collaboration with UNEP.

Achieving our vision of a world living in harmony with nature will require transformative and systemic change across all sectors. We bring together governments, businesses, research bodies and more to put nature at the heart of decision-making.

"We are entering a make or break decade for nature with UNEP-WCMC set to play a pivotal role in ensuring humanity finally begins to reverse the catastrophic loss of biodiversity globally."

Jonny Hughes, CEO of WCMC
Our strategy

We deliver our strategy through four independent impact areas which are complemented by three cross-cutting innovation areas.

VISION 2050
Living in harmony with nature

MISSION
We develop knowledge and capacity for a nature-positive world
**The people**

We have around 180 amazing people who make up our organisation. We are a really friendly bunch of professionals and do not think a single person has ever left the organisation without saying that it is the people that make the organisation fantastic and how much they will miss them when they leave. We truly do have world class scientists and professionals!

**The culture**

Our culture is very supportive. There are lots of ups and downs in life, and we want to support our people through the difficult patches, so they can flourish again. We have a free employee assistance line that is available to all employees and their families and offers 6 remote counselling sessions and other advice services.

We have redesigned our kitchen and library to make a fantastic social space where you can have a quiet chat or a loud lunch with your colleagues! We also have tea every Wednesday afternoon, with locally homemade cakes and catch up with everyone and everything that is going on in the Centre.

We are affiliated with Cambridge University, and have rooms in the David Attenborough Building that we can use when we wish. We are also a member of the Cambridge Conservation Initiative and often collaborate with our CCI colleagues here.

WCMC attaches great importance to addressing safeguarding and ethical considerations in all activities carried out by its staff, including where partner organisations or individuals are part of the delivery of our work. This includes children and vulnerable adults in the community who may be vulnerable to abuse. WCMC acts with integrity, is transparent and expects applicants to share the same values.

**Diversity**

We really take our diversity seriously, as we operate globally and need to have the people perspectives within the organisation, to fully understand our clients and partners that we work with. Our aim following the introduction of the points based immigration system was to increase our diversity not only in our range of nationalities, but in all protected characteristics (age, disability, gender reassignement, marriage and civil partnership, pregnancy and maternity, race, religion or belief, sex).

We have a sponsorship licence and always take the best candidate for the role from a whole range of applicants and offer sponsorship to those that require it. We have people that have worked for us, for more than 30 years, and our fantastic internships often attract the best and brightest graduates.
If you are looking for a rewarding and challenging post where you can impress us with your analytical expertise and innovative ideas, we want to hear from you.

Please complete our application form and personal details form and send them together with your 2 page CV through this link.

We screen candidates based on skills and experience and not their personal details. Please do not include a photograph on your CV, and note that any applications which include a photograph may be automatically rejected.

Closing date: 29th March 2022
